BORA™

CLAMP EDGE™

WIDE TRACK

Heavy Duty Straight Edge Tool Guide

The new Bora Clamp Edge™ Wide Track will increase the versatility of Circular Saws, Jig Saws, Routers, Biscuit Jointers and more.

Features integrated dual "T" tracks allowing the head of a standard 1/4"-20 bolt to slide into the "T" track to attach shop accessories, jigs and attachments for many applications.

The extra wide 3-3/8" aircraft-grade, extruded aluminum body allows for straight, accurate cuts, and provides rigid clamping.
