AUXILIARY CLAMPS

Turn your BORA™ Clamp Edge WT into a vise with the WT Auxiliary Clamps. Intended for light duty clamping, the auxiliary clamp jaws allow you to secure your Clamp Edge WT to any work surface without marring the surface! Whether it's finishing, gluing, sanding or even routing; your work will stay put in the jaws of the Clamp Edge WT.

SAW GUIDE

The WT Saw Guide helps eliminate blade binding by keeping your saw accurately aligned with the cut. The adjustable cursor takes the guess work out of the alignment of the blade to the guide. Make your cuts accurately and evenly saving time and costly material waste.
